Units issued and outstanding-end of period	32,708	32,597	32,554	32,284	31,967

(1) "Net operating income" is not a measure defined by generally accepted accounting principles ("GAAP"). It is, however, a term frequently used by real estate professionals to measure the intrinsic return of a real estate portfolio. Cominar defines this measure as operating income, as determined in accordance with GAAP, before interest on borrowings, depreciation of income properties, and amortization of deferred expenses and other assets.

(2) "Adjusted net income" excludes, for the quarter ended June 30, 2005, a non recurring gain of \$248,000 as a result of the sale of an income property.

(3) Distributable income generally means net income determined in accordance with Canadian GAAP excluding depreciation of income properties, amortization of above-market leases, compensation costs related to unit options, deferred rentals and gains or losses on sale of income properties. The distributions paid annually to unitholders must represent at least 85% of distributable income and partly determine the return obtained by unitholders.

(4) As at September 30, 2005.

(5) The debt to gross book value ratio is equal to the total of long-term debt and bank indebtedness, divided by gross book value (total asset value plus accumulated depreciation).

(6) The interest coverage ratio is equal to net operating income, divided by interest on borrowings.

(7) There ratios are not defined by GAAP and may differ from that of other entities.
