Weighted-average number of units	34,365	32,585	36,339	34,578	33,506	32,997	32,770
Units issued and outstanding-end of period	36,600	32,941	36,600	36,215	34,382	33,318	32,941

(1) "Net operating income" is not a measure defined by generally accepted accounting principles ("GAAP"). It is, however, a term frequently used by real estate professionals to measure the intrinsic return of a real estate portfolio. Cominar defines this measure as operating income, as determined in accordance with GAAP, before interest on borrowings, depreciation, amortization, Trust administrative expenses, other income and unusual items.

(2) "Recurring net income" excludes, for the quarter ended March 31, 2006, \$554 in non-recurring expenses in connection with our offer for Alexis Nihon Real Estate Investment Trust. For the quarter ended December 31, 2006, it excludes gains on sale of real estate assets in the amount of \$835.

(3) Distributable income means net income determined in accordance with Canadian GAAP excluding depreciation of income properties, amortization of above-market leases, compensation costs related to unit options, deferred rentals and gains or losses on sale of real estate assets. The distributions paid annually to unitholders must represent at least 85% of distributable income and partly determine the return obtained by unitholders.

(4) The debt to gross book value ratio is equal to the total of long-term debt and bank indebtedness, divided by gross book value (total asset value plus accumulated depreciation).

(5) The interest coverage ratio is equal to EBITDA, divided by interest on borrowings.

(6) These ratios are not defined by GAAP and may differ from those of other entities.
